## Who We Are & What We Do

Team Digital provides ongoing support to school districts during the planning, implementation, and evaluation of digital courses, professional development sessions, and blended or online learning environments at district, regional, and state levels. We provide the expertise in emerging online teaching and learning practices that allow for active learning, effective content authoring, personalized lesson design methods, and best practices in helping educators transform system-centered practices into student-centered practices. We also provide ongoing digital support to Virtual Arkansas, ADE, and other state-wide initiatives. We interact with media production workgroups, learning management systems and consultants, technology solution experts, pedagogical experts, curriculum design experts and educators around the globe.

Team Digital is an experienced team of Digital Learning Support Specialists that is coordinated in partnership between the Arkansas Department of Education and the Arkansas Education Service Cooperatives. The Team helps educators determine the best method of digital education to meet their learning goals. Digital education can be used to personalize learning for every student and educator in Arkansas. We can help you reach your goals using digital solutions by supporting your development, design and deployment of high quality, interactive digital education programs. If you envision providing a more personalized and flexible learning experience, we will meet with you to begin developing a plan for implementation. Call us today to set up a consultation.

Let's innovate.  
Let's re-imagine.  
**Let's Remix!**
